

SERI JUNIOR OVERSEAS SCIENTIST FELLOWSHIP

Call for Applicants

The **SERI Junior Overseas Scientist Fellowship** is an immersion opportunity designed for budding researchers in ophthalmology and visual sciences. It provides a platform to nurture young scientists around the world and advance their training in these fields, as well as to establish collaborative network between them and SERI.

The Fellowship will require minimum 3 months and maximum 6 months of full-time commitment between July 2023 to December 2023, and this is contingent to the nature of the project. One Fellowship will be awarded for 2023 on a competitive basis.

Each Fellow will be placed under the direct supervision of a Host Principal Investigator at SERI. A proposed training programme has to be jointly developed with the Host PI and be submitted as part of the application.

ELIGIBILITY

- Self-driven individual with a strong interest in ophthalmology and visual sciences research
- PhD graduate with no more than 5 years of postdoctoral experience
- Not based in Singapore
- Not holding another concurrent fellowship or position of similar nature in Singapore during the proposed period of Fellowship

FINANCIAL SUPPORT

- Monthly stipend of S\$5,000 during the course of Fellowship

The Fellow will have to undertake his/her own arrangements insofar as his/her flight and living arrangements in Singapore are concerned. Ideally this should be prepared prior to his/her arrival at Singapore.

TO APPLY

- Please refer to appended the following document:
 1. SERI Junior Overseas Fellowship Call For Application
 2. SERI Junior Overseas Fellowship Application Form

Deadline for Application: 31 January 2023

(Results will be released tentatively by March 2023)
