

# Laser Treatment Post-laser Care & Advice

Singapore National  
Eye Centre

SingHealth

www.snec.com.sg

1

Eye drops have been instilled in your eyes to dilate (enlarge) or constrict (shrink) your pupils to facilitate laser treatment.

Your vision may be blurred for up to 1 to 2 days\* depending on the individual.

2

You may feel more comfortable using sunglasses if you experience any glare.

3

You should avoid driving after your laser treatment.

Have someone to accompany you home whenever possible.

4

You can take mild painkiller (e.g. Panadol) should you experience pain and headache.

5

Should you require an urgent review following any laser procedure, please contact SNEC at the following numbers.

- During office hours at 6227 7266 (Appointments)
- After office hours at 6532 4865 (Answering Service)

For urgent consultation after office hours, Sundays and Public Holidays, please proceed to the Singapore General Hospital Accident and Emergency Department (SGH A&E), located at Block 1.

\*Depending on the eye condition and the extent of laser treatment, this duration may vary and can last longer.
